

# Power Excel

**Duration:** 2 Days (9:30 am to 5:00 pm)  
**Faculty:** Mehul Shah (+91 92274 50000)  
**E-mail:** mehul@infogami.co.in

**INFOGAMI**  
— curating data —

**Training Mode: Hybrid (Online & Offline)**

## Prerequisite:

Participant should be comfortable with Formulas & Functions, Pivot Tables, Data Visualization.

### Session - 1

Power Pivot  
Why we need Power Pivot?  
Activating Power Pivot  
Pivot Table from multiple workbooks  
Load data from text files  
Loading data from the clipboard  
Refreshing Power Pivot Data  
Editing data connection

### Session - 2

Formatting Columns  
Hiding Columns  
Calculated Columns  
DAX Functions  
Sort Pivot Table Column  
VLOOKUP in DAX function  
Calculated Measures  
Using Cube Functions

### Session - 3

Power Query  
Fetch data from CSV file  
Fetch data from Text Files

### Session - 4

Fetch data from a website  
Fetch data from Excel  
Fetch Data from Database  
Refresh Power Query data

### Session - 5

Consolidate Data  
Power Query joins

### Session - 6

Conditional Logic  
Write your own conditional formula

### Session - 7

Create Column from Examples  
Unpivoting Data  
Pivoting Data  
Pivoting Stacked Data

### Session - 8

Grouping and Aggregating Data  
Grouping Queries  
Viewing Query Dependencies  
Creating Custom Columns  
Making Queries Work Together  
Enhancing Power Query Productivity

## Notes:

It includes Study Material and Certificate.

You are required to bring your laptop.

**Excel 365** should be installed on your laptop.
